razorops

The Simplest Container Native CI/CD

Razorops is a container native continuous delivery platform to automate your workflow from development to production in a few steps.

Features

Container Native

Connect Environments

Deployment Pipeline

Automatic rollback

Incorporate GitOps

Configuration as Code

Git as SCM

Language Agnostic

Platform Independent

razorops

Pipeline Features

- Pipeline as code
- Test Performance
- Test Coverage Reports
- Docker Caching
- Language Caching
- Artifacts Storage
- Isolated Builds
- Parallel Pipeline
- Effortless Scaling
