

The Simplest Container Native CI/CD

RazorOps is a complete container native CI/CD solution handling all aspects of the software lifecycle from the moment a commit is created until it is deployed to production.

Helping SMEs to Adopt Container Native DevOps

At RazorOps we have realized that before implementing CI/CD process automation for any IT product Deployment, Their Dev team needs to have a proper DevOps process and tools setup to speed up quality delivery. We help teams set up and migrate container native DevOps.

DevOps Engagement Process

- **Assessment:** Ideation and brainstorming - In-person meetings to understand your DevOps goal
- **Finding the gaps:** Identifying the gaps and prioritising based on your current DevOps
- **Designing and Planning:** Designing the delivery and DevOps processes, Selecting the right container, micro services and cloud strategy
- **Execution:** Executing the right strategy and develop the right tool and necessary integration
- **Testing:** Supervising automation process and providing training to improve the process

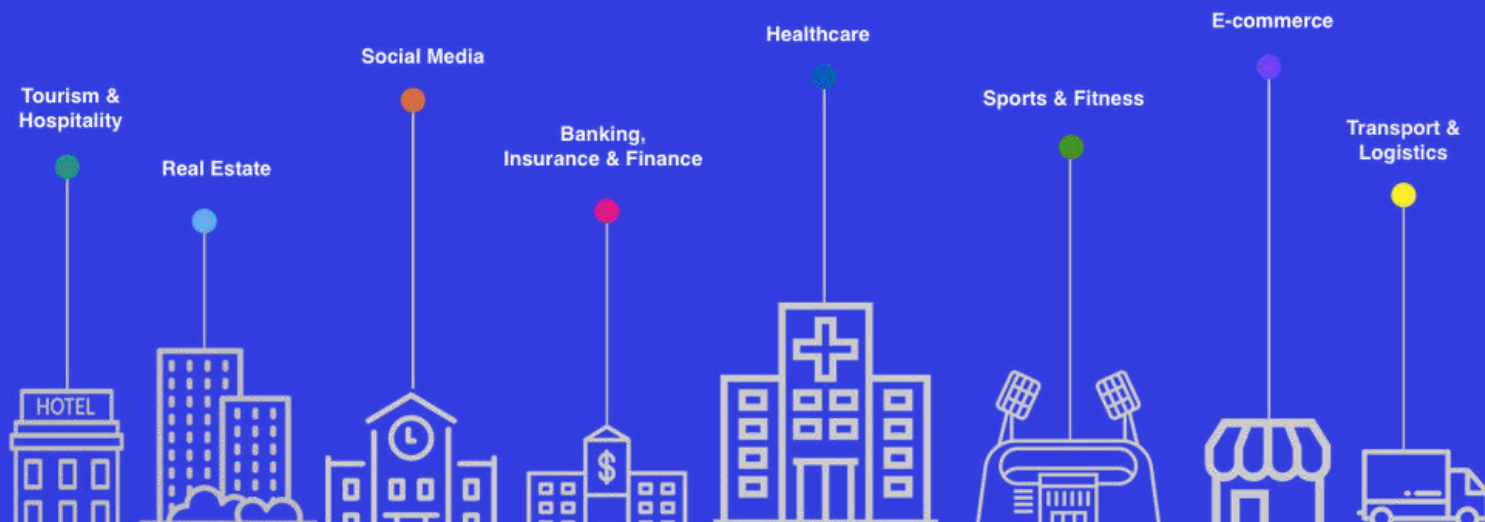

Kubernetes Services Offered

- Architectural Consulting
- Implementation and Onboarding
- Custom Development & Integrations

Kubernetes Support on any Infrastructure

Get enterprise Kubernetes support for multi cloud environments:

- Public Cloud - AWS, GCE/GKE, Azure, and more
- Data Center - Install Kubernetes with kismatic Enterprise Toolkit
