

# The Simplest Container Native CI/CD

Razorops is a container native continuous delivery platform  
to automate your workflow from development to  
production in a few steps.

# Features

**Container Native**

**Connect Environments**

**Deployment Pipeline**

**Automatic rollback**

**Incorporate GitOps**

**Configuration as Code**

**Git as SCM**

**Language Agnostic**

**Platform Independent**

# Pipeline Features

Pipeline as code

Test Performance

Test Coverage Reports

Docker Caching

Language Caching
